Anticoagulant Citrate Dextrose USP Formula A 1000 mL Supply Update

Dear Valued Customer,

DIN	Fresenius Kabi Product Code	Product Description	Allocation Date	Off Allocation Date
00788139	C4B7891X	Anticoagulant Citrate Dextrose USP Formula A 1000 mL	75% Allocation April 1, 2025	July 1, 2025

Fresenius Kabi Canada is pleased to inform you that production of C4B7891X has resumed at our supplier. In October 2024, our supplier's manufacturing facility was significantly impacted by the rain and storm surge from Hurricane Helene, which was unprecedented in Western North Carolina. We thank you for your patience over the past months as our supplier worked to fully restore their manufacturing operations.

As we look forward to resuming normal supply in the coming weeks, we will fulfill 50% of all existing open orders immediately. Starting April 1, all customers and distributors will be allocated 75% of historical monthly demand. We anticipate full availability by July 2025.

We thank you again for your collaboration and understanding in this matter.

If you have any questions or concerns, please do not hesitate to contact your Fresenius Kabi representative.

Sincerely,

Lucy Chen
Senior Marketing Manager, MedTech
